

BricsCAD®

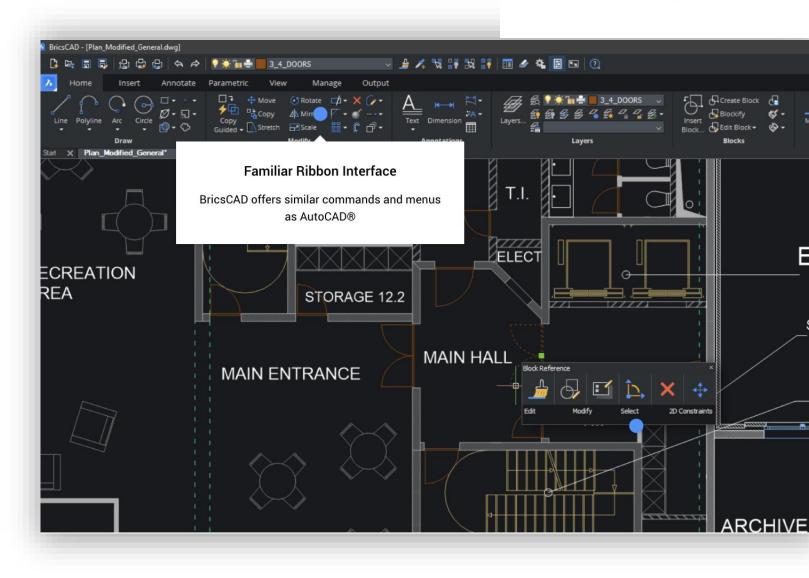

The future of .dwg

BricsCAD brings innovation and the highest AutoCAD® compatibility to help take your designs to the next level

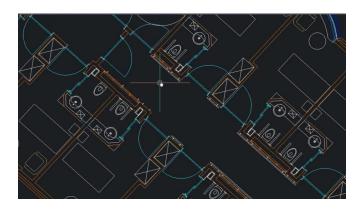

Familiar CAD

Leverage what you already know with full command, script, macro and menu compatibility with the industry-standard CAD program. BricsCAD feels like home!

- Command compatible
- Menu (.CUI, .CUIX) compatible
- Macro/script compatible
- Support file (.PC3, .LIN, .PAT, .DWT, .SSM) compatible
- Based on the DWG 2018 standard

Use your AutoCAD® Dynamic Blocks in BricsCAD

You can use the Dynamic Blocks that you created in AutoCAD® directly inside of BricsCAD. Control visibility states and stretch, flip, and rotate just as you would in AutoCAD®.

```
action tile "edit" "(setq edit (test_edit))")
        (action tile "accept" "(setq edit (test done))")
        (action_tile "cancel" "(setq edit (test_quit))")
11
        (setq ret (start dialog))
13
         (princ "\nIt Works\n")
         (princ "\nIt Does not Work\n")
16
17
18
     (defun test_edit ( / edit )
       (setq edit (get_tile "edit"))
23
```

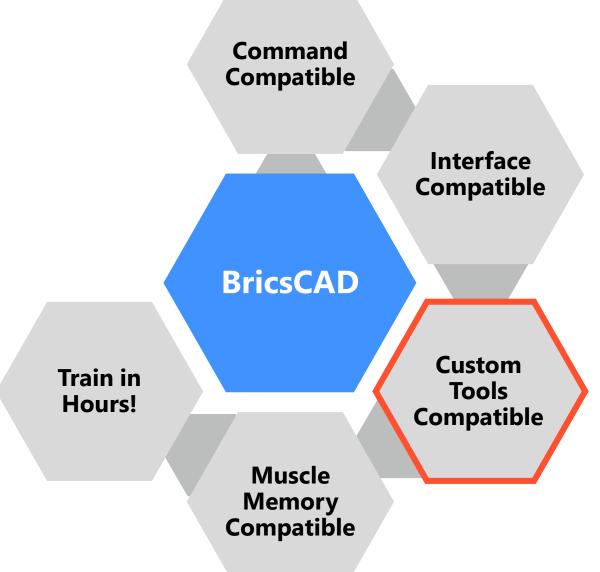

LISP Routines

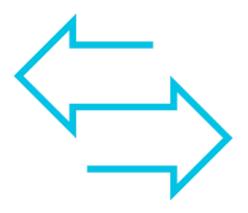

You can run LISP routines developed in AutoCAD® and other CAD applications and develop your own in the BricsCAD LISP Advanced **Development Environment** (BLADE).

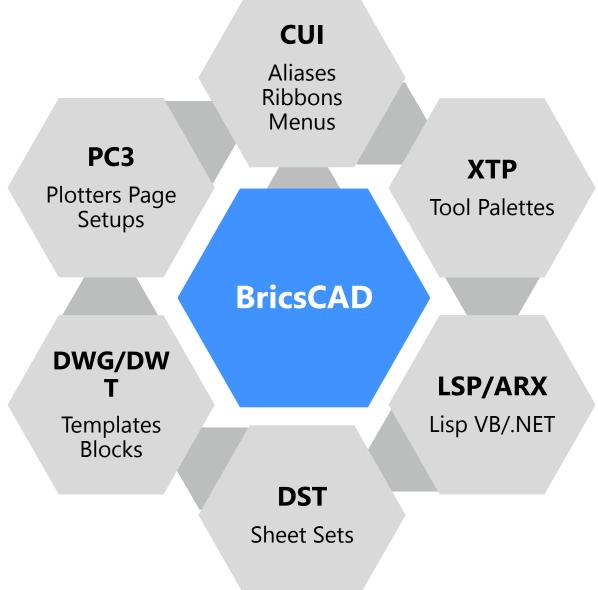

If you can use AutoCAD® you can use BricsCAD® because the commands and interface are so familiar. But what about customization?

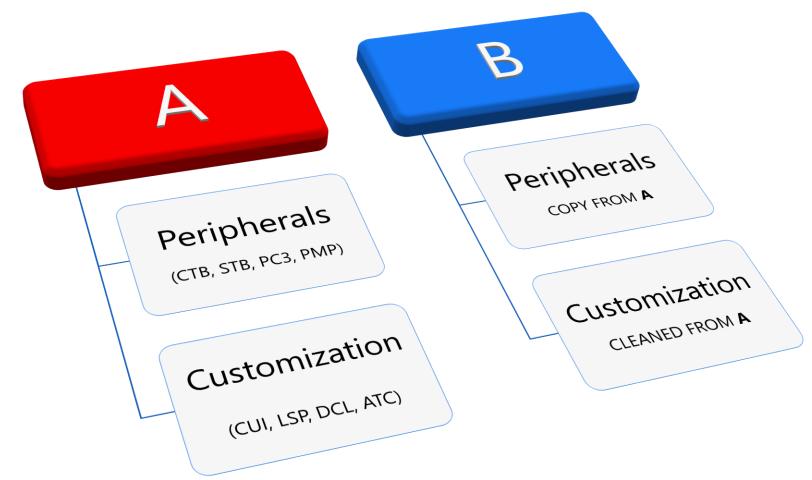

Your customization and **your** workflows are directly supported

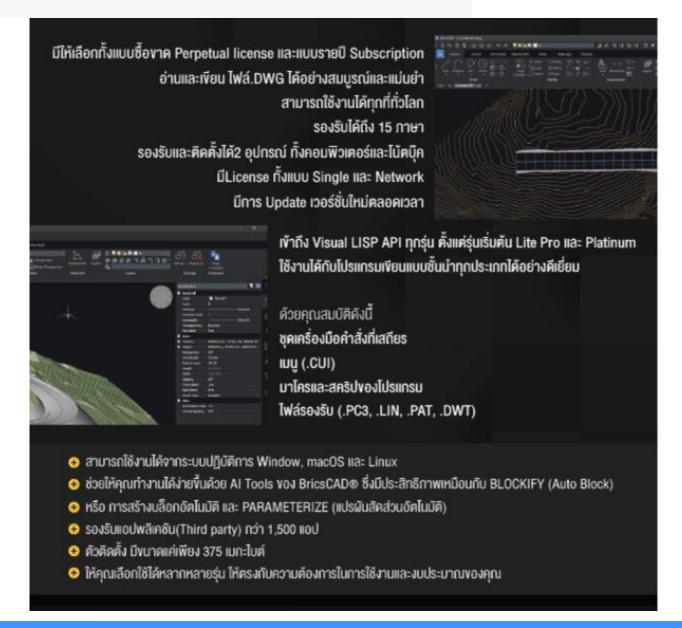

Parallel A and B installations

establish network folders
migrate customization
replicate peripherals
clean, minimum, migration
test B while still running A

ทำไมเลือกใช้ BricsCAD®

* Dynamic Blocks:

If you insert AutoCAD dynamic blocks into your BricsCAD drawing, you can, in most cases, edit those block instances. You cannot, however, create or edit dynamic block definitions in BricsCAD.

Instead of offering dynamic block functionality, BricsCAD focuses entirely on parametrics. It allows you to create both 2D and 3D block definitions using the same set of tools and workflow.

** Network Licensing:

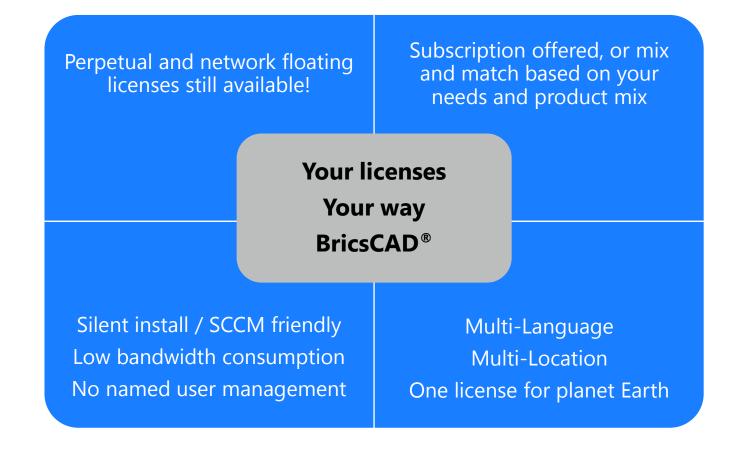

Network licensing is available at an additional cost.

*** 3D MCAD Data Exchange:

Activated with the additional Communicator for BricsCAD module.

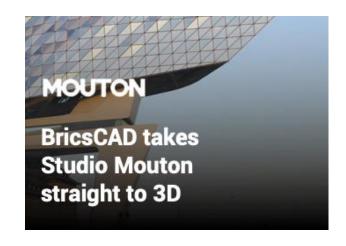

Licensing and Deployment Flexibility

All products contained in a single 417 MB installer!
